ENTRY-LEVEL CYBERSECURITY ANALYST

Pakistan, Islamabad

03425122551 | cedrickdiggery@gmail.com | [LinkedIn](#)

[GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity beginner with hands-on experience using Kali Linux, Nmap, Wireshark, Burp Suite, and Metasploit through labs and CTFs. Strong problem-solving and analytical skills, with knowledge of networking, vulnerability assessment, and incident-response fundamentals. Seeking a Cybersecurity Internship or Junior SOC Analyst role to build practical experience.

CORE SKILLS

SECURITY

SIEMbasics • Log analysis • Vulnerability scanning • IAM fundamentals • Incident response

SYSTEMS & NETWORKS

TCP/IP • DNS • HTTP/S • Windows • Linux • Active Directory basics • Wireshark

TOOLS & SCRIPTING

Nmap • Burp Suite • Splunk / ELK • Git • Python basics • Bash • PowerShell basics

HANDS-ON CYBERSECURITY PROJECTS

SOCHomeLab

August - 2026

- Built and configured a Wazuh SIEM home lab in a virtualized environment to centralize security monitoring and analyze endpoint activity.
- Practiced log analysis, alert investigation, threat detection, and incident-response fundamentals in a controlled lab environment.
- Investigated security logs, alerts, and system events, using Wazuh dashboards to identify suspicious activity and understand potential security .

EDUCATION & CERTIFICATIONS

Education:

Secondary School Certificate (SSC-II) –
Federal Board of Intermediate & Secondary Education

Certification - Earned or In Progress

- TryHackMe — Pre Security Learning Path
- TryHackMe — Love at First Breach CTF
- Hack The Box — Cyber Apocalypse 2026
- TryHackMe — Hacker Holidays

EXPERIENCE & LEADERSHIP

Cybersecurity Learner & CTF Participant

- Completed hands-on cybersecurity challenges through TryHackMe and Hack The Box, applying practical skills in enumeration, web security, cryptography, networking, and problem-solving.
- Built and maintained a SOC home lab to practice security monitoring, log analysis, alert investigation, and incident-response fundamentals.
- Documented cybersecurity projects and CTF solutions on [GitHub](#), demonstrating technical communication and structured problem-solving.

ADDITIONAL

CTFs / TryHackMe / Hack The Box: TryHackMe — 100+ rooms completed; Hack The Box — Cyber Apocalypse 2026 participant; TryHackMe Hacker Holidays 2026 completed.

Professional Memberships: Tryhackme
